“Wanna be start-up polymath &
building WEB”

PERSONAL/OPEN SOURCE PROJECTS

- **tocstack.com** (*Founder & Full-Stack developer*) : tocstack is a Cloud based Platform as a Service for fast application deployment using git . It helps developers to seamlessly create, manage and deploy web applications,microservices,REST api etc. App created on tocstack is directly linked to a subdomain . Developers can use tocstack as a auto-devops tool on their own-platform(AWS, Azure).

Github : <https://github.com/sjljrvis/PaaS>
Link : tocstack.com

- **tocstack-cli** (*Founder & Full-Stack developer*) : It is a simple command line interface built for developers to view application-logs and monitor status of their application/services hosted on tocstack.

<https://github.com/sjljrvis/mobystore>

mobystore.herokuapp.com

Wireless Door Locking System for smart homes — Based On Internet of Things and Android Devices

Android based door locking system allows user to open or close door lock wirelessly using smart phone. Hardware setup was interfaced with smartphone over bluetooth(HC-05) module & ATMEGA 16 (8 Bit micro controller)

SPACE (Voice assistant for android device)

Space is a voice assistant or extended service for android device where user can simply launch pop-up window from screen and enter their queries

For eg :

1. user can search for word meaning directly from pop-up window ,no need to explicitly search on browser or dictionary app
2. Can look for translated text directly from the screen.
